Hi Wayne

I'm thrilled to have discovered your speakers and website today. I've been looking for high sensitivity speakers (92dB+) for a while now. After reading about the Pi's on the website and the forum, I'm starting to get the feeling that I'm in the right place at last.

I'm busy building a FirstWatt M2 amp which is 25 wpc. So, the 2 Pi Towers seem like a good match and fits my budget as a kit. But that means I have to build the cabinets.

Would you mind sending the plans so I can have a gander before ordering the kits?

What drivers are provided in the kit? Is that information in the plans?

Thanks so much!

Christo
