Subject: Re: Does The Weather Affect The Quality Of Music? Posted by Jazzy on Thu, 16 Aug 2018 08:04:39 GMT View Forum Message <> Reply to Message

Wayne, I appreciate your explanation. Well, I guess if the people listening are there to enjoy the music, then they won't notice any difference in the sound quality of the musical instrument. For example, an orchestra performing in a park compared to the same orchestra playing in a theater will not matter to the listeners because they are there to enjoy and not to critique.
