Subject: Parts is parts. Posted by Poindexter on Sun, 01 May 2005 00:25:44 GMT View Forum Message <> Reply to Message

Hey, Mark,It's all there. Go look at the parts list. If you can live with two inputs (a toggle input switch), the switch is an ElectroSwitch DPDT center-off toggle from Digi-Key whose part number is listed. The main tranny is an Amveco toroid, likewise, which shifts for the princely sum of ~\$15 in onesies-twosies. If you need your several inputs, use the Elma 04-1261 from Percy, \$34 (plus the knobbie of yer choice); it's a dandy.Go look at the parts list, confoun' you. I spend hours making these things up and verifying that they're accurate.I'll have a better expo of this piece on my site in a day or two, but meanwhile, Yer Obeediyunt Servunt,Poinz
