Subject: Hissing while listening to vinyl. Posted by TheWanderer on Sat, 22 Dec 2018 03:47:28 GMT View Forum Message <> Reply to Message

I was recently listening to a record and I noticed a hissing sound periodically. Almost like the vocalists themselves were hissing. I thought maybe it was just the record, so I put another one on and the same thing happened. I gave everything a good cleaning but it's still happening. Anyone know what could be wrong?
