Pato wrote on Sun, 11 November 2018 17:47I have heard of animals being treated to some music to help them relax. Have you ever noticed your pet liking, or disliking a particular song?

My dog barks when I pause a movie or turn down the radio volume when in the car. I think that pets (in general) have an ear for sound. I have never heard of music being used to calm down a pet.
