Lost the Remote wrote on Fri, 11 January 2019 08:15I usually consider a soundbar to be a worthwhile upgrade. They take up little room, are simple to use, and they're pretty affordable. It helps create an immersive experience, especially when you're watching movies.

This is true especially when you consider quality and cost. There are soundbars that can be gotten from as low as \$200 to as high as \$4,812. What I am not really sure about is whether or not they can replace home theaters. Their biggest advantage is the fact that they don't take up a lot of space.
