Yes there are ton's of stuff. From amplifiers, preamplifiers, DAC's, speakers, etc, etc. So you'll just have to narrow down what you have a hankering to try. Probably if you've never done kit building and soldering you'll want to do a simpler kit format. But, it's all up to what you want to take a stab at. Don't intimidate yourself out of trying something. My first kit build was an amplifier. The venerable Hafler 220 power amplifier. I still use it, since the late 80's.
