Subject: Re: Gaming Audio Posted by TheWanderer on Sun, 17 Mar 2019 02:50:58 GMT View Forum Message <> Reply to Message

Audio can really make or break a game for me. If it's terrible quality or just really amateur sound effects, the game completely loses its appeal. I get distracted at how bad everything sounds and it makes my game experience stink. Thankfully, there are plenty of games with top-notch audio that you can tell a lot of thought and time went into creating it.
