I recently moved to a new space and have been putting my system back together which consists of the below. I'm going to add some flanking subs to start, then distributed subs. I'll post some measurements as the starting point once I get further down the road. I've added 16 GIK treatments already on top of the 10 that I had so I've got it improved. If the room was only bigger! I'm sure adding the subs will help smooth out what I need next. As a former GedLee customer I'm familiar with the multi sub approach. However, I'm very excited to try the Parham approach who has been delightful with his time answering questions. :d

Motorola Modem sb6141> Emo Systems EN-70HD > (5) eero > Synology 1813+ (DSM 6.2), 4TB Seagate NAS Drives, 4GB RAM & Zero Surge & APC XS BX1000G/backup to Synology DX513) > Emo Systems EN-60KDS > Roon > Mola Mola Tambaqui > BSS BLU 50 > (2) Hypex NCore NC502MP > JBL M2 Master Reference
