Subject: Power Supply suggestions

Hi Everyone,I have recently obtained a transformer with the following outputs; 155v, 45v, 100-0-870v, 6.3v, 13.5-0-13.5v, 6.3v, 6.3v. I'm now wondering what I can do with it. I'd like to use it to power a SET amp (or if possible two small SET amps)but am not sure how I would configure the power supply. Does anyone have any suggestions as to how I would do this or alternate uses for this transformer (besides boat anchor)? Any opinions or advice much appreciated.Thanks,Myles
