Which services do you use for streaming movies and music? I'm subscribed to way to many entertainment services and will probably cut out CBS All Access since I had it for Star Trek: Discovery and wasn't that into the show this past season. I'm subscribed to SiriusXM for satellite radio and it's a keeper in my opinion. I feel the same about Netflix and it's the service I use most often. Have you ever been disappointed in one of the services you've used?
