They're not available in Europe through official distribution AFAIK. US Speaker and Parts Express in the US advertise them at \$450 ea. With shipping and taxes that works out at the equivalent of \$1170/pr imported into the UK compared with \$540/pr for the 4012H when they were last available. US buyers don't have to pay our 20% sales tax (VAT), of course.

The current premium option supported by the crossover is the Acoustic Elegance TD12S which is almost \$1000/pr with shipping and taxes. The hope is to find something better than the entry-level Delta 12 for around the price of the 4012HO give or take \$100 or so.
