Hi, All of them will work, none are really of high quality. The least expensive one I know of that will deliver quality sound is one by Pro-ject. Their USB model is pretty good. It all sort of depends on what you are playing. If the LPs are in great condition then the P-J is the choice. If they are not...then pretty much any one will do. None will by themselves clean up a bad recording. Audocity can do a pretty good job, but it will not make them perfect.
