Wayne Parham wrote on Fri, 27 September 2019 09:22: There are different components used for some drivers. For example, the PSD2002 uses different R1/R2 values than the DE250. The Delta 12LF uses a different capacitor in location C4 than the other midwoofers. But there are no major changes required for the new drivers. The Delta Pro 12 and the 12PLB100 use the same crossover components as the Definimax 4012HO.

Thank you very much!
