Hi Wayne,

I'm itching to build the 3 Pi speakers. How do you rate the B&C PLB100 compared to the other offerings including the Definimax 4012HO ? I assume you have done listening tests?

Also can I have the 3 Pi plans please?

One more question, I don't think I will use an amp greater than 200 watts per channel. Do the upgraded xover inductors help with power handling?

Thanks in advance

Paul.
