Shucks, let me just kick at that wobbly LED topic leg holding up the table. LED, Let's-End-Daylight, (savings). What if a compromise were made, like all the political hacks say. Come springtime, instead of spring ahead one hour. Make it 30 minutes. And hitherto dispense with and forget about this idiotic teeter tottering back and forth twice a year. Jacking with our sleep and clocks. An old concept that could use a new ending.
