Malfoy wrote on Sun, 14 July 2019 07:23 You can opt for a circuit breaker that has a power surge protector. You may have to hire an electrician to install this device. This is a good plan, especially when your area has frequent power disruptions.

And also when your audio units are high-end. Some people are very serious about their audio and don't skimp on the price. You can bet that it's insured as well.
