Wayne Parham wrote on Thu, 12 December 2019 09:30You've got mail!

Dear Wayne, currently I have a pair of 3012HO. I have looked at frequency response, T/S params and everything else, the 3012HO and Delta Pro 12A are almost exactly the same. They are too similar to each other.

Could I just put it to use with PSD2013 (I also have a pair here) with 3Pi's crossover and H290C?

What is the basic electrical slopes of 3Pi's XO? I want to try an active version of 3Pi as an opportunity to learn from you.

Thank you
