Hi, What's an app, what's a radio :lol: :lol: I use the radio in the car much of the time but I have used a hi-res player to feed the system via USB direct connection. Why not it is a high end Harmon Kardon unit that came with the vehicle. At home I use a Marantz 2265B receiver for FM in the shop. My main stereo system has no provision for radio or FM or internet and is strictly for vinyl, CD and R-R tape. :)
