Subject: Powered soundbars

Anyone have experience with or could recommend a good powered soundbar? Mainly for dialogue and just regular old tv viewing. Not for home theater. I already have that equivalent. But I just want something to augment the obvious poor smart tv speakers. Which is universally acknowledged as being unintelligible for vocal understanding. At least the Samsung tv I have now. Do these soundbars have to be controlled by a separate remote for volume, (probably)? Any other issue to steer clear of?
