Adjusting all the knobs to get the sound "just right" would be the extent of his work.  
Can I print out a fake degree from Full Sail and get in on this side hustle? :lol: I have an ear for music, I know what sounds good to me and I know how to adjust the bass and treble. If I need more experience, I'll consult professor You Tube.

I kid, but that does sound like a good idea.

If you have an ear for music and fix one or two set-ups, referrals will have you overwhelmed with no one wanting to see your qualifications. I think anyone can be good at this by checking out a few YouTube tutorials.
