Hi, Since I don't want to find out how bad the virus can be we are playing it safe and pretty much staying home. There really are few places we could go if we thought it was wise.

I really wonder what the nuts with guns think they are going to do? Shoot doctors, shoot politicians or just shoot anyone they want to. My personal opinion is they need to be locked up or sent to a nut house. Sorry for being so blunt, but IMO they are way out of control.
