I love that movie too! One of my best friends is a mechanical engineer, and in the early 1980s, he built a 351 Cleveland with 4bbl heads and a Comp 268 cam. He had a 68 Mustang with that engine and 411 gears in a 9" rear end. Talk about crazy fast. We literally got ticketed for wheelies on the street, I was with him at the time. Amazing!
