Customers access their Amcrest Camera via Pc, Laptop, or Maccomputer by opening a mainstream web browser like Firefox, Google Chrome, Safari, etc. To access the Amcrest camera from your computer you need to first locate the camera's IP address. To locate the camera's IP address, you need to download our free.Amcrest IP Config Tool software. Click to Download button:amcrest.com/downloadsAfter installing, find the IP address associated with the device you would like to view in the browse
