Hi, I never got around to answering an earlier question. For high sensitivity speakers .....yes The Poddwatt DMB (dual mono block) or the Mini Blocks (just like 1/2 of the DMB each) are perfect. 5 watts class A ultra linear push-pull. Super clean sound typically under 0.5% THD+H&N, response from 10HZ to 35K +/-0.25 db at 1 watt. They work fine with speakers over 92db/w in many situations. I can use them with my Martin Logan ESLs (92dbw) and have a nice listening level. Not suitable for loud stuff in my room (12X10X17 feet).
