From what I understand their 2011 album "A different kind of truth" was basically a bunch of unused stuff from the late 70's early 80's.

Still really cool stuff composed by Eddie....but don't think you can crank it up and rock out on your Hifi system..... its squashed to hell!

Im not sure if it was tracked that way, or just mastered that way.
If only mastered with DRC (dynamic range compression) then it can always be "Re-mastered".

Too bad it fell victim to the "loudness war",
