lilbill wrote on Mon, 20 May 2019 04:38 Some sound engineer once told me that acoustics isn't all about deadening a room and killing all reverberation; it is more of restoring a room's natural sound balance through adopting physical adjustments to the space. What are your thoughts?

Makes sense to me. Killing reverberations is soundproofing. Adjusting the physicalities of a room will change the acoustic capabilities when you start adding sound in the room.
