Subject: Re: rectifying the hum Posted by Wayne Parham on Mon, 10 Oct 2005 04:30:59 GMT View Forum Message <> Reply to Message

Nothing is as pure as a regulated supply. Takes the parts count way up thought. Then again, some amps are less sensitive to PS ripple. One of the three things I like best about PP is the PS common-mode ripple cancellation. The other two are harmonic distortion cancellation and damping, but those are different subjects altogether.
