sammi40 wrote on Mon, 23 November 2020 15:24Good luck! When my radio crapped out it was a fuse. I took it to the dealership and they ran a test for me.
You could also just get the fuse diagram for your year, make and model.....pull the right one out and see if it's still good. Beats paying a dealer for the work.

This might tun into a car forum. LOL
