Hi, I did a quick check on Google and there are many companies

https://vinyl-pressing-plants.com/all-vinyl-pressing-plants-list/countries/

And it indicated in another inquiry at that time there were 23 in 2017 in the US with 5 more to come on line that year. The listing shows 81 now. I question if Apollo actually did 75% of the pressings. The huge number of other companies would seem to be at odds with that value. Still the loss of any company is sad.
