Subject: Which wire is used in Linn T-Kable (tonearm cable for Linn Akito tonearm)?

Hi all,

Laste week I bought a used Linn Basik turntable with an Akito tonearm.

I'd like to upgrade the tonearm cable with a DIY / custom-made cable.

It's mentioned several places in this thread that Linn's own premium-end cable the T-Kable is based on wire from Mogami.

I've tried to find out which specific one it is, but hasn't succeeded. I hope someone here can help?

Thanks in advance, Kasper
