I recently bought a Beosound A1 wireless speaker by Bang & Olufsen, and it is tiny! It's about the size of an old CD Walkman. The battery lasts for a solid 15 hours. It sounds amazing too. I also have a wireless by JBL called the Charge 4. It has an excellent battery life and it's easy to tote around. It sounds okay, but it's nothing spectacular. It's an excellent wireless speaker for the price!
