Subject: Re: SE - Copper would be cool! Posted by Steve Eddy on Thu, 22 Dec 2005 03:33:09 GMT View Forum Message <> Reply to Message

I've never seen smooth seams when plastic welding. It's basically just a small diameter heat gun used to melt plastic rod that is fed into the seam.Basically like a hot glue gun except you use hot plastic, yes?SE --- Copper would be cool!*grumble* *grumble* *grumble* se
