I've come to realize that too. My new tubed line preamp with phono I hooked up to my old Hafler DH220 amp. And I can hear it's slight hum on the phono end. But using my tubed amplifiers it's smooth as baby's feet. Pi speakers let it all through. Like a spaghetti western know as The good, bad and ugly. The good is most music recorded, the bad is some and the ugly, is just that.
