I have some very good news!

They're available on the shopping cart right now:

What's really cool is the flat-pack kits come in three options, rather than two:

1. Surface mount
2. Flush mount
3. Recessed grille, like shown below

Grille frames are also available for the third option. The grille fabric isn't supplied - you must add your own - but that lets you choose a color and pattern that matches your wood grain and finish.
