To temporarily derail my own thread...

I had the week off between Christmas and the new year, so I decided to use up some left over job material (thin brick) for our media/listening room (basement).

Only had enough to do the front corners so I flanked them out with mortar cement- thin set mix. The walls gotta be flat or the thin brick will look bad!

Honestly laying regular brick is quicker and easier (for me), but of course heavier and takes up much more space.
