Thx for replying !

Hmm, 1 in 3 out, i would prefer it to be as idiot proof as possible, meaning impossible to connect bass or mid to high so on so forth.

In: 1 piece nl2 or nl4

Out from xover
One nl8 with 3 seperate 2 strand cables in them.
Or seperate nl2 and two nl4's each with One driver cable in it.
Or 1 nl4 for high and mid and a nl8 for low.
Or 1nl2 for treble and 1 nl4 for mid and low.

Going into High:nl2 mid nl4 low nl4.

Or something completely different lol.

I just know very Little about the pros and cons of the different versions, so thought it would be a good idea to ask those less confused :blush: :blush:
