I'm having a issue with my crossovers. Lows and highs outputs are playing, but nothing at all from mid. Midhorn makes sound if I Connect to low/high output. None of the drivers makes any sound at all if I Connect them to mid output.

Strangely enough it's the same with both crossovers.

What am I doing wrong? Can you guide me through finding the flaw? Shipping Price is insane so I would like avoiding sending them to you.

I have this version xover
