You've got mail!

So glad you can get the B&C 12PLB100 and DE250-8 locally. That will greatly reduce the cost. You can also build the crossover to save money. But I would encourage you to get the H290C waveguides from us. Otherwise, the crossover won't be right for the horn.

To keep waveguide shipping costs down, I would recommend using a freight forwarder. They will provide a USA address, which you will then use in the Pi Speakers cart, by entering the address they give you. This will make your shipping costs much lower. Do a search on the internet to find out what freight-forwarding companies are available to you in your area.
