Thanks Wayne. Yes, I remember it was the Theater 4 model. I had the drivers, the Eminence crossovers, heck I even cut the wood for the boxes. I was moving and gave it all to a friend. He's had them for years, and now wants to finish the build. I doubt he's interested in upgrading the speakers. I live 1800 miles away from him, and he has no tech ability. LOL this should be interesting.
Steve
