Rusty wrote on Tue, 05 April 2022 10:11 I find the realm of AI to be a concern for future conflicts. Where that will go seems the subject of sci-fi and horror.

If it's realistic sci-fi, some country or company will do their best to incorporate it into real life.

The capabilities are as endless as the funding and brains behind it, which is why ethics need to play a HUGE role in this.

Just stream soft jazz worldwide through satellites and everything will be ok. :)
