Rusty wrote on Tue, 05 April 2022 09:49This binaural beats seems to be another name for space music.

Electronic music evolved into the realm of space music compositions that like the binaural beats are relaxing tones extending into infinity seemingly.

That makes sense. I don't know where I've seen it, but there was music from space that NASA recorded. Although that was more similar to classical music, listening to binaural beats reminds me of outer space.
