
Subject: 4 Pi - any "doping" suggestions to make the JBL look nicer?

Hi,

I just finished a pair of 4 Pi's. Thanks, Wayne. They sound great.

I bought a used pair of the JBLs and, while they sound good, they look terrible. Kind of a rat-like color that does not impress SWMBO. I'm looking for suggestions to make them look darker and less rat-like. I've heard one guy suggests using MinWax wood hardener for this purpose, and to make them last longer. I've also seen people who have used hair spray, diluted varnish, contact cement, all sorts of stuff.

Any ideas appreciated.

Alan
