Hey everyone. As Wayne mentioned, John is in a bad way. He's not going to be doing any more speaker building so he needs to get rid of a storage unit full of stuff. Woofers large and small, 100s of tweeters, crossover caps, power resistors, inductors, midrange, tube amps, etc.

John's brothers visited the storage unit and took a lot of photos. In a few days I can post those here if Wayne's OK with it. In 2018 I helped John with his inventory, so we should be able to assemble a good list of what's there.
