Yes John passed away last night. He was a tough old bird right up to the end. John had amazing audio design skills and hearing. I've never met anyone quite like him. He tought me more than I can even fathom.

I'm still not sure what's going to happen to all his stuff. John wanted me there to sell it, but it's not possible for me to do so. I have a fair number of photos of what he had in storage, plus an inventory form 2018. John wanted it all to go to a good home, or homes.

ASAP I will be helping his family with all of John's speaker inventory. I'll post here first.
