I'm helping to find a home(s) for John's gear that is currently in storage in Kerrville. I can post photos here, and a "speculative" inventory. John and I did an inventory back in 2018, but I know he sold off a lot since then. Because there is no one there to take an exact inventory, my best guess is all that I can post.

Obviously it would be best for John's family if someone could be there to sell off the items one per one, as that would bring the most money, but that is unlikely to happen. So we are hoping that someone will want to buy the whole lot, clear out the storage and find happy homes for all of John's gear.

Any thoughts? I want to post here first before posting anywhere else, because LSAF was so important to John.
