Hey Shane. Yes somehow John ended up with half a dozen or more of the Music Angel amps of different types. I think the one you heard John also ran KT120s and KT150s in it. He sure liked that amp.

Problem is, I don't know what's in there. John talked to me about having something like 8 or 10 "Ming Da" tube amps, but I don't know what those are.

John left a treasure trove in storage, but also a mystery.
