Great write up Wayne! You and your squeeze got maximum satisfaction from both of your personal favorites and each others. It's always nice to take in some music and see the performers put some pizazz into their show, not running through the list. They always speed up the cadence when that happens. I've been a bit like Pa Kettle, (gotta get around to that one of these days) stepping out amongst them on the music scene since before the pandemic even. I had an vigorous period of music hopping that kinda burned me out. Something will draw me back though. I like the music of Men at Work too. The Aussie's are an unpretentious lot. It reflects in their music and character. No worries.
