Wayne when you do up a review it's a production! In print not unlike the show you saw. Another smash-a-roo. I never had really known about Michael Buble'. Sounds like he's in the tradition of modern contemporary crooner's like Harry Connick. The big band sound is a unique thing to be heard live. I saw the Count Basie band years ago and more recently the Wynton Marsails Jazz orchestra. The power and drive along with the instrumental solos is wonderful. A fine singer tops it off.
One thing though. When you go out to a music venue. Do you spend some time evaluating the sound system? I would think. Of course!
