Subject: Paintings come to life

I saw this the other day on the Youtube. It's really kind of touching to see this A.I. rendering of the subjects of old paintings, with the coup de grace being The Mona Lisa by Leonardo da Vinci come to life as real people. Unromanticized. Smiling and blinking their eyes at us. Amazing testament to the power of what the technology can provide.

Abe Lincoln given the same treatment. Even made to look contemporary.
